

## 67CF Series Filter Regulators

- ☆ Compact and Light Weight
- ☆ Designed for Digital Instrumentation
- ☆ No Air Loss
- ☆ Easy Maintenance

W7426

A 67CF Series regulator used as a pilot supply regulator for the Type 299 pressure regulator

W7412

A 67CF Series filter regulator shown with optional pressure gauge

W7423\_1

A 67CF Series regulator used as a supply regulator for digital instrumentation

- ☆ High Performance
- ☆ Integral Filter
- ☆ Internal Relief Valve
- ☆ Rugged Construction

## Introduction

The 67CF Series regulators are typically used to provide constantly controlled, reduced pressures to pneumatic and electropneumatic controllers and other instruments. These direct-operated regulators are suitable for most air or gas applications. Other applications include providing reduced pressures to air chucks, air jets, and spray guns.

## Features

- **Compact**—The 67CF Series regulators are engineered for outstanding performance in a compact, light-weight package.
- **Internal Relief**—The Type 67CFR has an internal relief valve with a soft seat for reliable shutoff with no discernible leakage.
- **Panel Mounting**—Panel mount construction includes spring case with 1/4-inch NPT vent, handwheel adjusting screw, and mounting nut.
- **Instrument Supply Regulator**—Provides a clean air supply to a variety of pneumatic and electro-pneumatic instrumentation.
- **Digital Instrument Supply Regulator**—Designed for the accuracy, repeatability, and hysteresis demands of digital instrumentation.
- **Pilot Supply Regulator**—Improves the accuracy of two-path control regulators by reducing inlet sensitivity caused by fluctuating inlet pressures.
- **Pressure Loading Regulator**—Provides high accuracy and improved performance in dirty steam service by eliminating the need for a pilot regulator (see figure 2).
- **Sour Gas Service Capability**—NACE (MR0175) compliant construction available.
- **Integral Filter**—An integral filter ensures clean downstream air supply.
- **Ease of Maintenance**—No special tools are required to perform maintenance, and all maintenance can be performed with the regulator in the line. Filter elements are easily replaced. The one-piece valve plug cartridge allows easy inspection and replacement.

**Figure 2.** 67CF Series Regulator Operational Schematic

- **Rugged Construction**—The 67CF Series regulators are engineered for longer service life with minimal maintenance requirements.
- **Second Outlet**—Body side outlet for pressure gauge or other uses.
- **Powder Paint Coating**—Fisher products are powder paint coated, offering impact, abrasion, and corrosion resistance.
- **Corrosion Resistant Fasteners**—Adjusting screw and screws are double zinc-chromated for enhanced corrosion resistance.
- **Full Usable Capacity**—Fisher regulators are laboratory tested. 100 percent of the published capacities can be used with confidence.

## Specifications

### Body Size, Inlet and Outlets Connection Style

1/4-inch NPT screwed

### Maximum Inlet Pressure (Body Rating)<sup>(1)</sup>

250 psig (17,2 bar)

### Outlet Pressure Ranges

OUTLET PRESSURE RANGES, PSIG (bar)	CONTROL SPRING DATA		
	Part Number	Color	Wire Diameter, Inch (mm)
0 to 20 (0 to 1,4)	T14130T0012	green stripe	0.135 (3,43)
0 to 35 (0 to 2,4)	T14059T0012	silver	0.156 (3,96)
0 to 60 (0 to 4,1)	T14058T0012	blue stripe	0.170 (4,32)
0 to 125 (0 to 8,6)	T14060T0012	red stripe	0.207 (5,26)

### Maximum Emergency Outlet Pressure<sup>(1)</sup>

50 psi (3,4 bar) over outlet pressure setting

### Capacities

See table 1

### Wide-Open Flow Coefficients

**Main Valve:**  $C_g$ : 11.7;  $C_v$ : 0.36;  $C_f$ : 32.2

**Internal Relief Valve:**  $C_g$ : 1.45;  $C_v$ : 0.045;  $C_f$ : 32.8

### Pressure Registration

Internal

### Accuracy

**Inlet Sensitivity:** Less than 0.2 psig (0,014 bar) change in outlet pressure for every 25 psig (1,72 bar) change in inlet pressure

**Repeatability:** 0.1 psig (0,0069 bar)<sup>(2)</sup>

**Air Consumption:** testing repeatedly shows no discernible leakage

### Type 67CFR Internal Relief Performance

Low capacity for minor seat leakage only; other overpressure protection must be provided if inlet pressure can exceed the maximum pressure rating of downstream equipment or exceeds maximum outlet pressure rating of the Type 67CFR

### Filter Capabilities

**Free Area:** 12 times pipe area

**Micron Rating:**

*Cellulose Element:* 40 microns

*Glass Fiber Element:* 10 microns

*Stainless Steel Element:* 40 microns

### Regulator Temperature Capabilities

**With Nitrile (NBR):**

-40° to 180°F (-40° to 82°C)

**With Fluoroelastomer (FKM):**

0° to 300°F (-18° to 149°C)

**With Silicone (VMQ)<sup>(3)</sup>:**

-60° to 180°F (-51° to 82°C)

### Drain Valve and Spring Case Vent Location

Aligned with inlet standard, other positions optional

### Approximate Unit Weight

1 pound (0,5 kg)

### Construction Materials

**Body, Spring Case and Dripwell:** Aluminum (ASTM B85/Alloy 380)

**Pusher Post:** Polyester resin

**Upper Spring Seat:** Zinc-plated steel

**Diaphragm Plate:** Zinc-plated steel

**Adjusting Screw:** Zinc-plated steel

**Filter Retainer:** Zinc-plated steel

**Valve Plug:** Brass stem with nitrile (NBR) plug (standard); aluminum stem with nitrile (NBR) or fluoroelastomer (FKM) plug; or stainless steel stem with nitrile (NBR) or fluoroelastomer (FKM) plug (optional)

**Soft Seat:** Nitrile (NBR) (standard), or fluoroelastomer (FKM) (optional)

**Diaphragm and O-Rings:** Nitrile (NBR) (standard), fluoroelastomer (FKM), or silicone (VMQ) (optional)

**Control Spring:** Plated steel (standard) or Inconel (for 67CFR NACE)

**Valve Spring:** Stainless steel (standard) or Inconel (NACE)

**Drain Valve:** Brass (standard), aluminum, or stainless steel (optional)

**Filter Element:** Cellulose (standard), glass fiber, or stainless steel (optional)

### Options

- Handwheel adjusting screw
- NACE construction
- Ammonia service construction
- Panel mount (includes spring case with 1/4-inch vent, handwheel, and panel mounting nut)
- Closing cap (available on spring case with 1/4-inch NPT vent)
- Aluminum or stainless steel drain valve
- Fluoroelastomer (FKM) elastomers for high temperatures and/or corrosive chemicals
- Silicone (VMQ) elastomers for cold temperatures
- Triple scale outlet pressure gauge (brass or stainless steel)
- Stainless steel stem on the valve plug
- Fixed bleed restriction mounted in the side outlet
- Tire valve in second outlet
- Pipe plug in second outlet

1. The pressure/temperature limits in this bulletin and any applicable standard or code limitation should not be exceeded.

2. Repeatability is the measure of the regulator's ability to return to setpoint consistently when traveling from steady state to transient to steady state.

3. Silicone is not compatible with hydrocarbon gas.

**Figure 3.** 67CF Series Regulator Used to Pressure Load a 92P Steam Regulator

## Capacity Information

Table 1 shows the air regulating capacities of the 67CF Series regulators at selected inlet pressures and outlet pressure settings. Flows are shown in scfh (at 60°F and 14.7 psia) and in m<sup>3</sup>/h(n) (at 0°C and 1,01325 bar) of air.

### Note

**The 67CF Series regulators may be sized for 100% flow using capacities as shown in table 1. It is not necessary to reduce published capacities.**

To determine the equivalent capacities for other gases, multiply the table capacity by the following appropriate conversion factor: 1.29 for 0.6 specific gravity natural gas, 0.810 for propane, 0.707 for butane, or 1.018 for nitrogen. For gases of other specific gravities, divide the table capacities by the square root of the appropriate specific gravity.

To find wide-open flow capacities for relief sizing at any inlet pressure, perform one of the following procedures. Then, if necessary, convert using the factors provided above.

For critical pressure drops (absolute outlet pressure equal to or less than one-half of absolute inlet pressure), use the following formula:

$$Q = (P_1)(C_g)$$

where,

Q = gas flow rate, scfh

P<sub>1</sub> = absolute inlet pressure, psia  
(P<sub>1</sub> gauge + 14.7)

For pressure drops lower than critical (absolute outlet pressure greater than one-half of absolute inlet pressure), use the following formula:

$$Q = \sqrt{\frac{520}{GT}} C_g P_1 \sin \left( \frac{3417}{C_1} \sqrt{\frac{\Delta P}{P_1}} \right) \text{ DEG}$$

where,

Q = gas flow rate, scfh

G = specific gravity of the gas

T = absolute temperature of gas at inlet, °Rankine

C<sub>g</sub> = gas sizing coefficient

P<sub>1</sub> = absolute inlet pressure, psia

C<sub>1</sub> = flow coefficient (C<sub>g</sub> ÷ C<sub>v</sub>)

ΔP = pressure drop across the regulator, psi

Then, if capacity is desired in normal cubic meters per hour (at 0°C and 1,01325 bar), multiply scfh by 0.0268.

**Table 1. Capacities**

OUTLET PRESSURE RANGE, SPRING PART NUMBER AND COLOR, PSIG (bar)	OUTLET PRESSURE, PSIG (bar)	INLET PRESSURE, PSIG (bar)	CAPACITIES IN SCFH (m <sup>3</sup> /h(n)) OF AIR	
			10% Droop	20% Droop

		250 (17,2)	1700 (45,6)	2580 (69,1)

## Overpressure Protection

The 67CF Series regulators have maximum outlet pressure ratings that are lower than their maximum inlet pressure ratings. A pressure relieving or pressure limiting device is needed if inlet pressure can exceed the maximum outlet pressure rating.

Refer to the Capacity Information section and the relief sizing coefficient in the specifications table to determine the required relief valve capacity.

The Type 67CFR regulator has a low capacity internal relief valve for minor seat leakage only. Other overpressure protection must be provided if the maximum

inlet pressure can exceed the maximum pressure rating of the downstream equipment or exceeds maximum outlet pressure rating of the Type 67CFR regulator.

## Ordering Information

When ordering, complete the Ordering Guide on page 8. Refer to the Specifications on page 2. Review the description to the right of each specification and the information in each referenced table or figure. Specify your choice whenever a selection is offered.

## Ordering Guide

### Type (Select One)

- ☐ Type 67CF (without internal relief)\*\*\*
- ☐ Type 67CFR (with internal relief)\*\*\*

### Quantity (Specify)

\_\_\_\_\_

### Spring Case Style (Select One)

- ☐ Standard with drilled hole vent\*\*\*
- ☐ Handwheel adjusting screw\*\*\*
- ☐ Panel mount (includes 1/4-inch spring case vent, handwheel adjusting screw, and mounting nut)\*\*\*
- ☐ Closing cap and 1/4-inch NPT spring case vent\*\*\*

### Outlet Pressure Range (Select One)

- ☐ 0 to 20 psig (0 to 1,4 bar) (not available for NACE)\*\*\*
- ☐ 0 to 35 psig (0 to 2,4 bar)\*\*\*
- ☐ 0 to 60 psig (0 to 4,1 bar)\*\*\*
- ☐ 0 to 125 psig (0 to 8,6 bar)\*\*\*

### Diaphragm, O-Rings, and Valve Plug (Select One)

- ☐ Nitrile (NBR) (standard)\*\*\*
- ☐ Fluoroelastomer (FKM)\*\*
- ☐ Silicone (VMQ) diaphragm, O-rings, and nitrile valve plug\*

### Filter Material (Select One)

- ☐ Cellulose (40 microns) (standard)\*\*\*
- ☐ Glass (10 microns)\*\*\*
- ☐ Stainless steel (40 microns)\*\*\*

### Drain Valve (Select One)

- ☐ Brass (standard)\*\*\*
- ☐ Aluminum\*\*\*
- ☐ Stainless steel\*\*

### Drain Valve Location (Select One)

- ☐ Position 1 - Aligned with inlet (standard)\*\*\*
- ☐ Position 2
- ☐ Position 3
- ☐ Position 4

### Spring Case Vent Location (Select One)

- ☐ Position 1 - Aligned with inlet (standard)\*\*\*
- ☐ Position 2
- ☐ Position 3
- ☐ Position 4

### Second Outlet (Select One)

- ☐ Open (standard)\*\*\*
- ☐ Plugged with pipe plug\*\*\*
- ☐ Tire Valve\*\*\*
- ☐ Pressure Gauge (see below)

### Triple Scale Pressure Gauge (Optional)

#### Brass Gauge

- ☐ 0 to 30 psig/0 to 0.2 MPa/0 to 2 bar\*\*\*
- ☐ 0 to 60 psig/0 to 0.4 MPa/0 to 4 bar\*\*\*
- ☐ 0 to 160 psig/0 to 1.1 MPa/0 to 11 bar\*\*\*

#### Stainless Steel Gauge

- ☐ 0 to 30 psig/0 to 0.2 MPa/0 to 2 bar\*\*\*
- ☐ 0 to 60 psig/0 to 0.4 MPa/0 to 4 bar\*\*\*
- ☐ 0 to 160 psig/0 to 1.1 MPa/0 to 11 bar\*\*\*

### NACE (MR0175) Construction (Optional)

- ☐ Yes\*\*

### Ammonia Service Construction (Optional)

- ☐ Yes\*\*

### Replacement Parts Kit (Optional)

- ☐ Yes, send one replacement parts kit to match this order.

Fisher Regulators Quick Order Guide	
***	Standard - Readily Available for Shipment
**	Non-Standard - Allow Additional Time for Shipment
*	Special Order, Constructed from Non-Stocked Parts. Consult Your Fisher Sales Representative for Availability.
Availability of the product being ordered is determined by the component with the longest shipping time for the requested construction.
